AzeusCare
for CHILDREN'S SERVICES

Social and Health care services continue to be the subject of much change.

In Children's Services, authorities are being required to:

- meet the needs of the ongoing Working Together to Safeguard Children agenda and progress with the Munro Review

- deliver the multi-agency agenda around MASH, Troubled Families and aligning service plans to deliver better outcomes for children, often with decreased finance and human resources

- assess change requirements to specific service areas such as SEND and Adoption

- maintain good reporting mechanisms and assess the changing needs of the Safeguarding Performance Information Framework, CIN census, and changing inspection regime

Local authorities need a social and health care information system that supports professionals in their role—not one that drives or controls their role. In AzeusCare we believe we have delivered exactly that—a system that lends itself to simple, secure recording and ease of access to holistic information.

Improve Outcomes

Better information sharing for better outcomes – Facilitating better decision making for improved support for vulnerable children

Supporting early intervention – Helping get early support to maximise the use of a range of services

Improved financial and service management – Creating efficiency and monitoring trends and costs

Better quality and timeliness for decision making – Ease of recording gives better holistic case information

Better access to data and reports – Supporting the need to ensure children and young people are safe and healthy and able to achieve their potential

Gain Agility & Adaptability

Flexibility to move locally with change – Provision of standard workflows, but can be tailored to meet local recording needs and change from the Munro agenda

350 developers to support wider system change - Fast turn around of changes, but without losing quality

Collaborative working to include partner agencies – Bringing the right groups of professionals together at the right time, to provide co-ordinated assessment and support

High quality performance management – Reporting at your fingertips, statutory, through to ad hoc caseload and outcome reporting

Enjoy Accessible Technology

Ease of multi-agency use – Access for a range of individuals in a range of methodologies, but never compromising security

Truly mobile solution – 24/7 access with both offline and real time connectivity

Citizen and Provider portals – Supporting children or their carers recording their own information

Efficiency models for implementation – Enterprise licensing, and subscription models for better total ownership costs

Keeping recording simple – Making compliance and information availability easier to achieve

FUNCTIONALITY

Core

- Patient/service user pathway – supporting monitoring of a child's journey from contact, through assessment and care planning to case closure
- Workload management for managers and staff
- Reporting - from CIN census, through to workload reports and ad hoc reporting to support a range of roles and data reporting needs
- Tracking and monitoring of care planning and delivery
- Full foster care and adoption recruitment processes

Finance

- Full finance functionality - placement cost monitoring, ad hoc commitments, full transactional views, payment and discrepancy management and budget management

Collaboration

- Integrated children's portal for secure collaboration and information sharing with agencies and service users themselves

Interoperability

- Standards based development for integration with other systems such as health and Education to produce a 'single view of a child'
- Integration with MS Outlook and Calendar, corporate finance, EDRMS, Clinical Document Architecture (CDA), SharePoint, etc.

Configurability

- Fully adaptable forms to support changing recording and reporting needs
- Bespoke reports
- Configurable workflow to support, but not drive processes

Family-based Approach

- Family-based assessments, support plans and reviews
- Linking cases of members of the same family, extended family or informal family
- Convenient sharing and discovery of information from linked cases
- Tight security through consent-driven and role-based access controls
- Family histories that bring events from individual case chronologies
- Aggregation and separation of 'family' data
- Genogram

Mobile

- Offline e-Form — work remotely & upload MS Word documents as structured data
- 24/7 access from anywhere through cloud and mobile technologies

Safeguarding, LAC, CIN, CP

- Complete coverage of TAF, CIN, Child Protection Looked After Children processes (and configuration for Signs of Safety) with navigational aid
- Functions for early intervention and multi-agency initiatives such as Troubled Families, MASH and NHS work such as 'Safeguarding Children in a reformed NHS' etc

Intelligent Features

- Auto-save
- Spell checking
- Record linking and copying functions to reduce repetitive input
- Pre-population of data, avoiding duplicate entry
- Inline help and navigational aid with guidance to local and national processes

ABOUT AZEUS

Azeus has successfully delivered over 200 projects for over 60 public sector and commercial organisations. azeuscare is our lead product in the UK and we believe going to radically change the way social workers record and view information, supporting them in making crucial decisions with holistic information and ultimately delivering better outcomes for service users and local communities.

Accreditations and Awards

• Local Government Software Application Solutions framework (RM865), awarded by the Government Procurement Service (Buying Solutions)

• Azeus has been appraised at CMMI (Capability Maturity Model Integration) Level 5 (the highest level) since 2003 – CMMI is the de facto standard for assessing and improving software processes. Signifies the very high quality of the products and services delivered by Azeus.
