

# Welcome to Azeus UK Ltd

## A Subsidiary of Azeus Systems Holdings Ltd

**Azeus is an international software development house with over 26 years of experience in the delivery of critical system solutions in the areas of social care, health, police, aviation, eCommerce and libraries.**

With an outstanding track record of meeting the needs of complex public sector organisations we have delivered over 200 projects in Hong Kong and Asia. More recently our products and services have been recognized and welcomed in the United Kingdom, USA, Australia and Canada.

### Our Work in the UK

Within the UK care sector Azeus UK Ltd is currently working with a number of English local authorities to implement AzeusCare, our highly configurable case management system, in three completely different contexts;

- Children's Social Care/Early Help,
- Children's and Adults Social Care combined (including Care Act 2014 compliancy),
- Special Education Needs and Disability (for the Children and Families Act 2014).
- Hospice Care
- A further configuration is also available for community health and hospice settings.

Remarkable for its fresh, modern 'look and feel', it is a flagship example of our user-centric design approach which puts the needs of the users at the top of the design agenda.

### Our Approach to Design

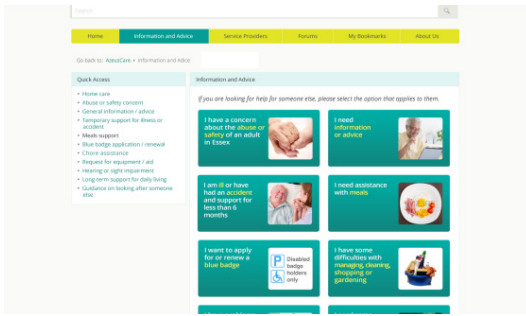

Customer-inspired design is crucial to the success of our products and our 250 technical personnel from within Azeus group deliver solutions that draw on the best of modern technologies.

We have an extensive range of experience across multiple areas including Java, .Net, Delphi, XML, XSLT, Web services, Ajax, JQuery, JSON, Oracle, MS SQL, DB2, IOS, Android, HTML4/HTML5, JavaScript, CSS, and Java applets. We recognize, too, both the cost savings and innovative stimulus that can be derived from the selective incorporation of Open Source componentry and adherence to Open Standards for systems integration.

### Pioneering and Prototyping

Innovation drives our development strategy. In AzeusCare we have already pioneered solutions to enable both children and adult service users to have direct access to their records to view, edit and upload information.

We have developed a unique and highly visual approach to the recording and calculation of risk for safeguarding and an easy-to-

use set of tools for the multi-agency compilation of the Education, Health and Care Plan within the SEND process. Innovative design work continues to provide compliance with the Care Act 2014.

Giving potential customers the chance to evaluate new products in prototype is core to our philosophy. Current partnership projects include innovation in mobile field assessment, electronic life storybooks for Looked After Children and the multi-agency triaging of both adult and child Initial Contacts to support referral thresholds.

## Our Total Solution Approach

At Azeus we make it our business to understand that of our customers. We offer therefore not just software but a comprehensive range of technical and business services to facilitate implementation, maximise the effectiveness of 'business as usual' and support strategic review.

- External Hosting (with SaaS options)
- Managed Services for internally-hosted solutions
- Infrastructure Advice and Review
- Systems Integration and Data Migration/Conversion
- Bespoke Functionality Development
- Training Needs Analysis, Planning and Delivery (including eLearning)
- Business Consultancy, Change Management, Information Governance and Security Advice
- Benefits Realisation Review and Analysis
- Contract-life Help and Support Services

## Our Accreditations

Azeus's technical processes have been assessed at Level 5 under the SW-CMM model since 2002 and appraised at Level 5 under the Capability Maturity Model Integration for Software Engineering (CMMI-SW) model since 2003.

We have also been accredited as compliant to the requirements of ISO9001, 14001 and 27001.

**azeuscare**  
Easy to Use. Easy to adapt.
